One of the prominent measures is rainwater harvesting, wherein the college has set up systems to collect and store rainwater. This enables the utilization of rainwater for various purposes such as irrigation, cleaning, and groundwater recharge. The harvested rainwater helps in minimizing dependency on external water sources and contributes to water conservation efforts.

- Additionally, the college has installed bore wells to tap into underground water resources. These bore wells serve as alternative sources of water supply, reducing the burden on the municipal water supply system. By utilizing groundwater resources, the college ensures a sustainable and reliable water source for various activities.
- Moreover, the institution emphasizes economical water usage and reducing wastage. Awareness campaigns and educational programs are conducted to promote water conservation practices among students, staff, and visitors. Measures like repairing leaky faucets, installing water-efficient fixtures, and implementing regular maintenance routines are adopted to minimize water wastage.
- By incorporating these water management and conservation initiatives, the Government College of Education in Yavatmal demonstrates its commitment to sustainable practices. These efforts not only contribute to water conservation but also inspire individuals within the college community to adopt responsible water usage habits in their daily lives.
- **Rain water Harvesting:-** Rain water harvesting project has been implemented in the college. College has its own bore well facility. The water thus harvested help to increase ground water level.
- **Infrastructure Setup:** The College has established a comprehensive rainwater harvesting system on its premises.
- **Benefits and Impact:** Its initiative provides an educational opportunity for students, faculty, and staff. The college can raise awareness about the importance of water conservation, sustainability, and responsible water management practices.

Overall, rainwater harvesting at Government College of Education Yavatmal plays a significant role in sustainable water management and conservation efforts. Through this initiative, the institution actively contributes to preserving water resources, reducing water wastage, and promoting a greener and more sustainable future.
